WOLVER HOLLOW ROAD DRAINAGE PROJECT

May 23, 2011

Dear Residents,

As you have no doubt noticed, signs announcing the commencement of the Drainage Improvement Project have been erected on Wolver Hollow Road. To resolve the flooding along Wolver Hollow Road, an underground drainage system is being installed along the east side of Wolver Hollow Road from Pine Valley Road north to Chicken Valley Road. It will also be necessary to move both gas lines and fire hydrants. Today, I spoke with the National Grid representatives working on the road who say that, weather permitting, their work on the gas lines will be completed this week.

All in all, the project is anticipated to be completed by October 2011. I do not, at this time, know if or when there will be any road closings.

I apologize in advance for the temporary inconvenience caused by the construction. However, for those residents who live in this immediate area and have tolerated ever more frequent and severe flooding, it will be well worth it.

I will keep you updated as the project progresses.

Thank you in advance for your patience.

Sincerely,

Terry L. Thielen
Mayor
